By Siddhant Misra

Paper pattern

- 4 out of 5 case studies to be attempted of 25 marks each
- MCQ – 40 marks out of 100 and the rest is descriptive
- A typical case study in IBS looks like this
  5 MCQ of 2 marks each = 10 Marks
  The remaining 15 marks is descriptive which may be 3Q of 5 marks each or 2 of 6 marks and 1 of 3 marks and so on.

Preparation timeline

I. Before study leave starts /During articleship

There are only 2 things I would have wanted to do if I were in my articleship for IBS and they are :

a) **Revising the 5 core subjects extremely well** and in detail (even though what you skipped in it may not come in the subject's exam, but it will haunt you in the IBS paper)

b) **Giving due importance to SPOM exams** (Set A and B) as ICAI has started to avoid asking direct questions which can easily be copied but instead it has started to ask questions which require analysis in the exam and if you are not atleast a little confident in the subject this analysis will consume the most amount of time and will affect the remaining questions to be attempted.
(In my attempt (May 25) Cost and law came for about 40 marks combined)

While it may be possible in the present scenario to just read and pass the SPOM exams in 3/4 days, I would recommend that you study these 2 subjects not just for the SPOM tests but for the main IBS paper (Think long term).

Breaking down point (b) subject wise for IBS

By Siddhant Misra

II. SCMPE preparation for IBS

Book used – ICAI SM and revision videos if needed for practical Q

Suggested time to do the prep for SPOM (Set A and B) – Preferably within the last 1.5 years before your exam as it is not something you would be able to revise again and again unlike FR/AFM if done early on.

Preparation

I would want to divide this subject into 2 parts – theory and practical.

For the **theory** – I would recommend having a **detailed index** (not just 1/2 pages) ***(Refer Index 2 on Page 14/)*** containing not just the subheadings but also a little about each topic as you may not necessarily be able to remember what is in that subheading if it comes in the exam.

Just opening this index on the last day is as good as not having the index at all.

Thus, when you study for the SPOM exam, read your index and the particular concept side by side so you can link what the concept is and where it is in your index.
I personally was only able to make my index in the study leave and so could not do this for SPOM prep but if you are able to **link the index and study SPOM** – it puts you in a great position for IBS before going into the study leave.

Most of us would not be able to do more than maybe 2 readings in the study leave for Law and Cost and so having such an index gives us an edge such that we have a brief idea of where what is in the ICAI book.

Also, theory questions of cost tend to come in MCQs more than the descriptive portion of IBS and so the above linking and understanding/recalling the contents of a particular subheading becomes even more essential.

Further unlike law, it is quite possible that you are **not able to narrow down which concept pertains to which chapter in the exam**
(For example,
Value chain analysis as a concept is a part of Ch 1 Strategic cost management
Disqualification of director is a part of Ch 1 Appointment and Qualification of BOD)

As you can see above, for law it is easier to narrow down a particular concept to a chapter which makes it easier to search an index but for cost the chapter name is not very indicative of what its contents are (Exception being standard costing and transfer pricing). If you are not familiar with your index, you will need to search through all chapters to find the particular concept - using up a lot of your time.

By Siddhant Misra

Practical

I cannot stress how important each sum is in Costing for IBS – it is almost guaranteed that 2 costing sums are going to land up in the exam with atleast one coming as a 5-marker descriptive question.

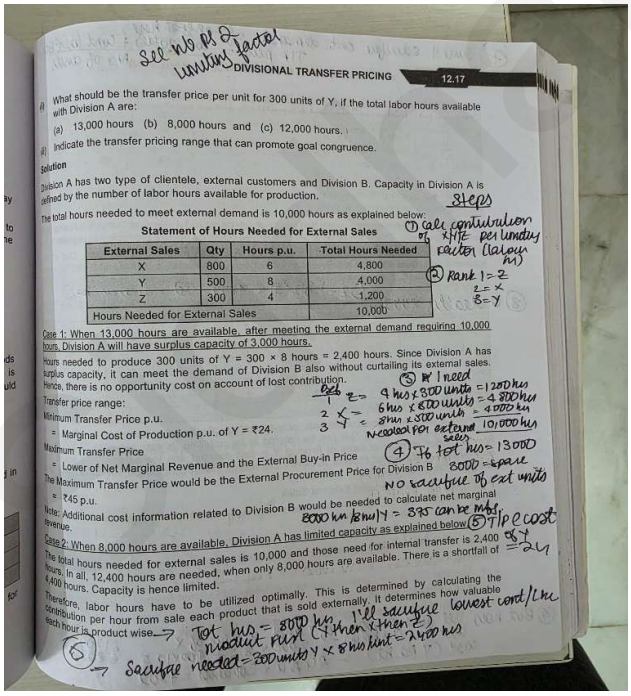

<u>Just having an index is not going to be useful here unlike theory.</u>

Thus, along with an index (***Refer Index 4 on Page 14/***), you should have solved each sum atleast 2 times correctly during the SPOM prep and study leave.

Even if the same question with different numbers comes in the exam and you find it in the ICAI book, you are lost as to how to start, and you will spend a lot of time first understanding the solution in the exam and then replicating it for the given question.

You should be able to solve each question correctly like FR and AFM and I would also recommend **making some short notes for each question as to how you solved it** beside the question itself and how you would explain it to yourself if you did the sum after a year.

An example of this could be as follows:

DIVISIONAL TRANSFER PRICING 12.17

What should be the transfer price per unit for 300 units of Y, if the total labor hours available with Division A are:

(a) 13,000 hours (b) 8,000 hours and (c) 12,000 hours.

Indicate the transfer pricing range that can promote goal congruence.

Solution

Division A has two type of clientele, external customers and Division B. Capacity in Division A is defined by the number of labor hours available for production.

The total hours needed to meet external demand is 10,000 hours as explained below:

Statement of Hours Needed for External Sales

External Sales	Qty	Hours p.u.	Total Hours Needed
X	800	6	4,800
Y	500	8	4,000
Z	300	4	1,200
Hours Needed for External Sales			10,000

Case 1: When 13,000 hours are available, after meeting the external demand requiring 10,000 hours, Division A will have surplus capacity of 3,000 hours.

Hours needed to produce 300 units of Y = 300 × 8 hours = 2,400 hours. Since Division A has surplus capacity, it can meet the demand of Division B also without curtailing its external sales. Hence, there is no opportunity cost on account of lost contribution.

Transfer price range:

Minimum Transfer Price p.u.

= Marginal Cost of Production p.u. of Y = ₹24.

Maximum Transfer Price

= Lower of Net Marginal Revenue and the External Buy-in Price

The Maximum Transfer Price would be the External Procurement Price for Division B

= ₹45 p.u.

Note: Additional cost information related to Division B would be needed to calculate net marginal revenue.

Case 2: When 8,000 hours are available, Division A has limited capacity as explained below:

The total hours needed for external sales is 10,000 and those need for internal transfer is 2,400 hours. In all, 12,400 hours are needed, when only 8,000 hours are available. There is a shortfall of 4,400 hours. Capacity is hence limited.

Therefore, labor hours have to be utilized optimally. This is determined by calculating the contribution per hour from sale each product that is sold externally. It determines how valuable each hour is product wise.

This is useful even during the exam in case you are stuck – you needn't read the entire 2-page solution again, instead just what you wrote should be enough to explain what to do and how to do it.

Everything you do in IBS is to **save your time – each second counts.**

By Gaurant Misra

III. Law preparation for IBS

Book used – Shubham Singhal's (SS) book and his revision videos

Suggested time to do the prep for SPOM (Set A and B) – Preferably within the last 1.5 years before your exam as it is not something you would be able to revise again and again unlike FR/AFM if done early on.

Preparation

For law barring FEMA and SEBI, I did **not find it as important to have a detailed index like I did for costing** simply because it is easier to narrow down the concept to a particular chapter and take it from there. (Refer example given on Pg 3/)

My index was less detailed **(*Refer Index 3 on Page 14/*)** but still one which I was comfortable with for the exam.
SPOM preparation for law is more than enough for IBS and nothing separately as such needs to be done

For FEMA and SEBI as these are extremely vast and most of us tend to skip parts of it for SPOM, it is recommended to have a detailed index for this and the preparation strategy for these 2 chapters would mimic that of the costing theory portion.

One thing I'd recommend you do is in the **ICAI index page**, ensure that **beside each subheading for all chapters you write just the section number**.

Why this is helpful? The index I used was of Shubham Singhal's (SS) book which has section numbers beside each subheading and **in the exam if a descriptive question comes the best way to answer is from the ICAI book**.

Now since you are only familiar with SS book for law, once you find it in the SS index – if you can just link it with ICAI index using the section number it becomes much easier it find it in the ICAI SM and replicate the same language from there for descriptive questions.

A question of FEMA ODI had come in our attempt and I couldn't find it in ICAI so I replicated it from SS book – for FEMA and SEBI you would notice that ICAI index is not as detailed as Module 1 so for these don't sweat trying to search the ICAI SM unless you are confident. Replicating SS books language for these 2 chapters alone is okay.

For MCQs – just SS book and the index was enough.

By Siddhant Misra

IV. What do I do different for the 5 core subjects for IBS?

Most of us know would know that there is nothing really different you can do but a few key focus points which we may miss out on for our preparation of the 5 subjects –

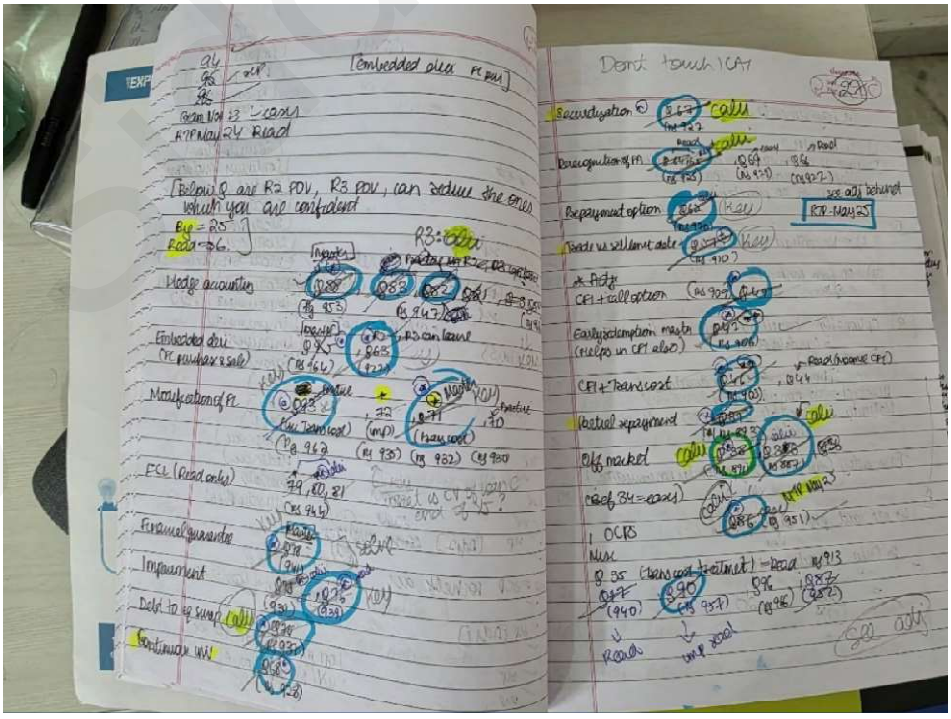

- **AFM/FR Theory:** Theory is extremely important, most of us tend to skip it for the AFM (which I would not recommend either) but in IBS taking my attempt as an example:
  The 5m Q was "if you are a strategic consultant, what measure will you suggest to the management to defend yourself against a hostile takeover?"

  Reading the word "strategic" most of us would have rushed to the SCMPE book and begun searching but in fact this was a question from Mergers and acquisitions from AFM.
  If one knew this – the 5 easiest marks of the paper, if not you'd search the entire SCMPE book and waste a lot of your time.
  FR theory would mean Accounting technology/ Ethics/ Conceptual framework/ IND AS 1

- **AFM and FR practical**
  Summarising each chapter's questions in the below format in a separate book was something I was doing to help myself for Revision 2 and 3 for FR and AFM but in fact it turned out to be a boon for IBS too.
  Ideally one should solve practical questions of FR and AFM in the IBS exam without having to see the Q bank but if there is a doubt - how can I search for that exact question easily by not wasting time?

  Such a summary of all questions helps you find it even within the chapter as chapters such as Financial Instruments/ Revenue can go upto 100 Q and it is not feasible to search every question.

  <u>IND AS 109:</u>

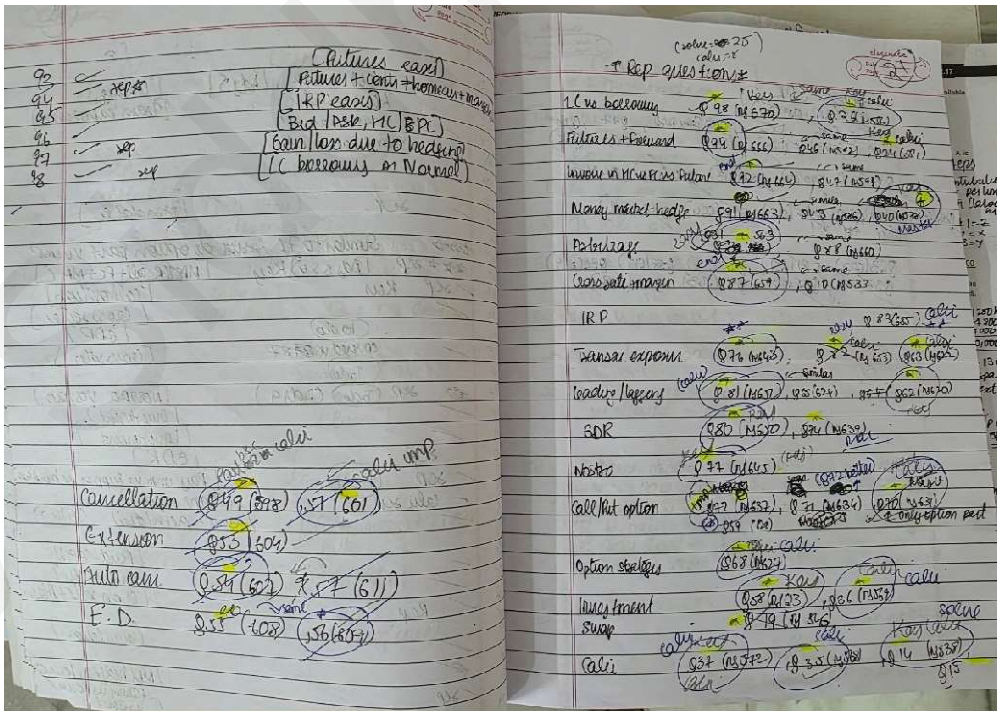

By Shrikant Misra

Ind AS 115:

Forex:

DT/IDT/Audit : Nothing different to be done for IBS specifically.

V. Practicing IBS case studies

Everyone tends to stress on the importance of solving case studies or for that matter "one case study a day" during study leave.
But **IBS case study solving is not about quantity but about quality.**
[I solved only about 15 case studies going into the IBS exam, but with each case study I learnt where I was going wrong and ensured it does not repeat.
I spent equal time in solving answers also analysing my answers and bottlenecks while solving]

What does quality mean?
Quality for me would be the following questions

- Are you improving with each case study?
- Are you aware of where you are going wrong and what kind of mistakes you are making?
- How are you ensuring you don't make the same mistakes
- Are you replicating the exam environment and solving under the pressure of time?
- Are you documenting all of the above items either in a book or excel so you can refer one day before the exam?

Contrary to what most believe - getting the question write in practice is the last priority.

So what should you actually focus on while solving?

1. Are you able to finish one case study in 55 minutes? If not, **where are the bottlenecks which consume most of your time**? Are these bottlenecks subject specific which you are seeing repeatedly in most IBS case studies you solved?

2. Do you have a broad **plan in your mind as to when you should be done with which Q**?

   (For me it was 20/25 min MCQ first and then the descriptive)

3. **Writing and solve all questions including descriptive.** Just finding the answer is useless and worse than not solving as you get a false sense of satisfaction.
   Understanding what to write out of those 4 pages of concepts in the ICAI SM is what you are working on.
   (Watching someone else solve on YouTube is good for reference but it does not in any way equate to you solving it yourself)

4. **Underline keywords** while practicing the descriptive solutions, helps the examiner find them during the correction process and grade it without having to go through the entire answer. *(Recommended for all subjects)*

5. Get used to being able to **solve FR/AFM/DT/IDT practical questions without referring to the book** – don't go easy on yourself by saying that you are just done with 2 revisions, after LDR you will be an expert with all concepts and will try then.

   Believe me that never happens, the minim gap between your FR prep and the IBS would be 12 days. So, you will never fully remember everything but **start building that faith in your own abilities by solving without finding that Q in the book and copying** , from practice itself as in the main exam – you won't have the luxury to search for every single

By Siddhant Misra

answer and write. The lesser you have to refer to the book – the better your time management is.

(DT and IDT I only searched the faculties book I referred for the purpose of quoting section numbers, generally not to check if what my approach to solving was correct or not except in those 1% cases)

6. **Understand the placement of where you will keep what reference/ICAI book**

Left down (Beside bench neeche) - Pile 1
(Down to up)
Audit ICAI Books (3)
DT ICAI Books (4)
FR ICAI Books (5)

Left down (Beside bench neeche) - Pile 2
(Down to up)
DT Compiler - 2
FR - BC Q bank (3)
AFM - BC Q bank (2)
IDT ICAI Books (4)
AFM ICAI (1)

Indexes - (Cost 3) + Law (1) + ICAI Mat index (1)

Below writing space)
(Down to up)
GST Chartbook
Indexes

Right beside on bench
(Down to up)
GST VB Module 1 and 2 **+** Inter book **+ IDT N.b**
Customs book + FTP Print +IDT Amendment
DT Compact (2) + SM notebook (1)
DT Amendment print of case laws
FR N.b SM (2) + Shield
AFM Notes + AFM SM N.B (1)

Right Up (On bench beside ans sheet)
(Down to up)
FR - SM Index of Questions of BC (2 Nb)
AFM - SM Index of Questions of BC (1 Nb)
Audit Q Bank + Main book
Audit Amendment notes + Qs
SCMPE - 2 ICAI Books
Law - ICAI 2 Book
Shubham Singhal 1 book

As you can see above, this was my tentative plan as to **where I need to keep which book around the bench in the exam and in which order too** (Down to up means the first book in that row would be at the bottom of that pile and should be one I need the least as it is more difficult to remove from the pile).

Right up on the bench: These are books to be kept closest to me and easiest to access as I know I would have to refer to these books during the exam.

Right beside on bench: Important reference books in case I need clarity on a particular concept

(E.g. IDT is at the bottom of the pile as this is the exam just before IBS so you should be confident with this. FR and AFM are on top)

Down beside bench (Relatively most difficult to access) - Q banks of most subjects and ICAI modules. As mentioned in the earlier point, the Q banks were the bottom of the piles as I knew I cannot refer to them unless I am completely lost.

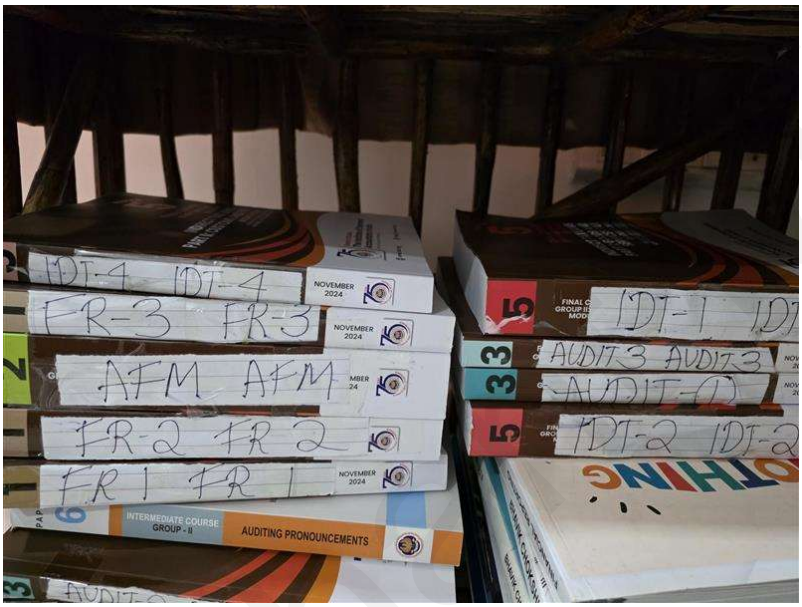

ICAI SM are important for every subject but **a problem I faced was that there are 5 SMs for FR** and similarly for other subjects too – **how do I minimise the time required to pick the relevant pages of ICAI SM out containing the chapter I want to refer**?

i) **Make an index** of the chapter name as per your coaching mat and which module is it in the ICAI SM. Using coaching mat chapter names is recommended as you are well versed with them. **(*Refer Index 1 on Page 14/*)**
This needn't be a detailed one and a simple 'Chapter name – ICAI Module number" would suffice.

By Siddhant Misra

ii) All I want to do using this is **identify which ICAI module I need to pick to find that chapter.**
(E.g. FR Module 2 for IND AS 40, DT Module 3 for TDS and so on subject wise)

iii) Once I have done this, I found **marking the ICAI books (Refer below) really helped me picking out the relevant ICAI SM identified in point ii) above easily**. As all my ICAI modules were placed below the bench, I found that this helped me pick out the exact ICAI SM easily without checking the name of every ICAI book.

iv) Once I identified this, I'd open the index page (I **stapled the first few pages like preface etc for each ICAI book, so I directly opened the index page itself**). Now I search within that IND AS/ Chapter name from the ICAI index page of that module as to what concept I want to refer to.

7. Try to **establish and follow the process repeatedly for each case study**, you aren't practicing getting the Q right – you practice the above process you have established so you can tackle almost any new question in the exam (I didn't take even one compilation of all past case studies into the exam, **go in ~~thinking~~ knowing that not a single case study will repeat and everything is new**)

8. **Prioritize solving ICAI PY Q papers** over BOS booklets as these are more representative of the exam questions. My ideal preference was

   PY Q papers case studies > ICAI RTP's > ICAI MTP's > BOS booklets

   I solved only 2 full mocks for IBS – this is because each case study in itself can be treated as a separate mock. You can actually divide the exam into **4 equal parts** unlike other papers and **hence if you are not able to do more than 1 full mock its okay**, as long as you have practiced case studies on a standalone basis and in a time bound manner. **One case study should be treated as a 55 min mock.**

By Siddharth Mishra

VI. **IBS – One day before the exam**

I had done the following in the 1.5 days before the exam (not necessarily in this order)

- Read the ICAI module for costing alongside the index. (Shouldn't take you more than 3 hours)
- Solve the important questions of costing and for the other questions read the summary you made earlier for each Q.
- Read costing index alone 3 – 4 times again and again. I had also highlighted in the indexes to further ease navigation within the indexes.
- Read the entire FR/AFM/Audit/DT coaching mat once. (Strictly allocate only 1 -1.2 hours to each subject so you don't go down the rabbit hole and try to "revise". All you do is "read" to refresh where what is – nothing else. Read the index of your coaching mat twice as well)
- Go through law mat along with the index side by side.
- Read the law index separately 3-4 times
- 2 case studies to refresh the processes you practiced.
  (Now that you know how your bench/desk will actually look – visualize and note down where you'll keep which books and solve accordingly – I had measured my bench with a scale in IDT exam and noted the measurements so that I could try to simulate this for the 2 case studies I solve before the exam)

  Good to go!
  (We often waste more time in thinking what to do rather than doing it before IBS exam day, try to draft a plan like above so you don't think on that day, just do)

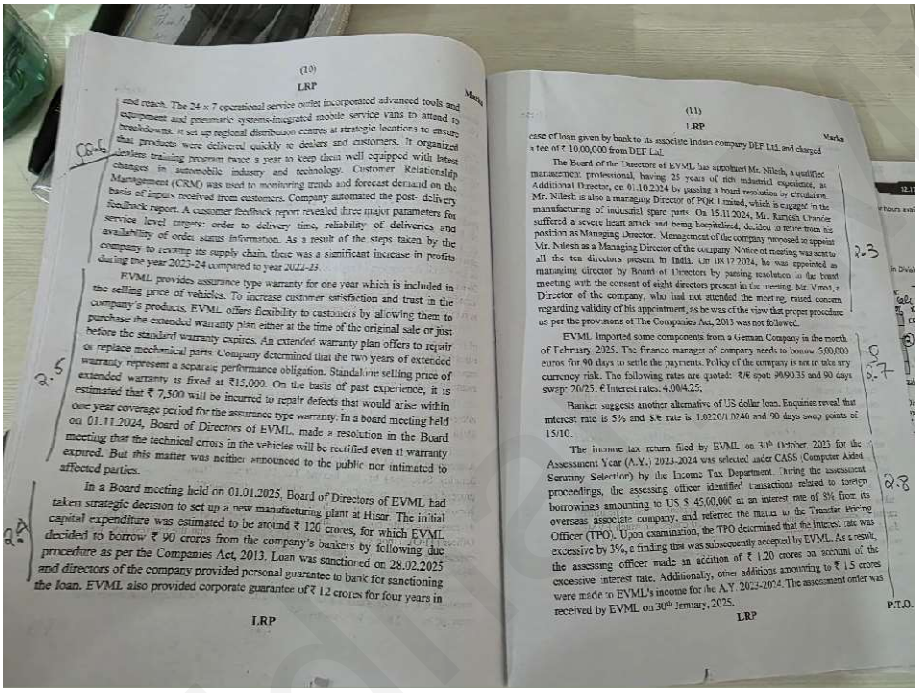

By Siddhant Misra

VII. During the exam

Reading time –

Go through the case study in brief and then read the related questions.

1. **Mark which portion of the case study pertains to which MCQ / Descriptive question** with a pencil
   (Don't do this after reading all case studies – preferable to do based alongside the case study itself as this alone saves a lot of time in your 4 hours)

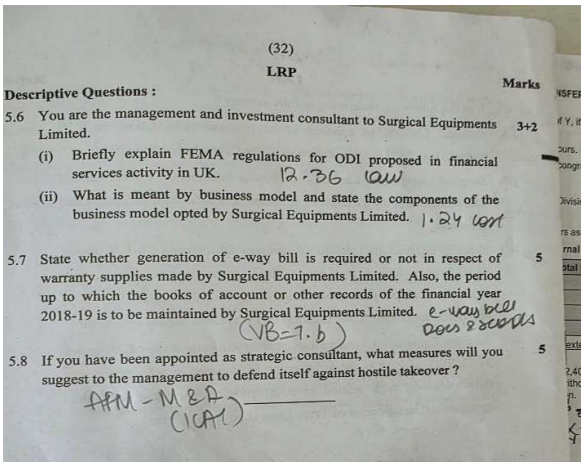

2. **Identify which 4 to attempt :** Read only the descriptive questions to in detail to identify which Q to attempt. In case of a deadlock between 2 case studies, a glimpse of the MCQs would be the tie breaker.
   If you are still confused (as I was) between which to attempt, once reading time ends – start off with the easiest Q first and keep solving in increasing order of difficulty. Once you have the 2 most difficult case studies left – trust your gut feeling.

3. **Mark which ICAI / Coaching material module to refer to for which Q.**

   (Eg: For an FR disclosure Q, just mark which ICAI SM that IND AS is in beside the Q itself from your index, so you needn't refer to the index when solving that Q)

   For cost and law since you are well versed with the index, you can also search in the index then (if confident) put down the page number of the relevant concept then and there. Refer below for an example:

By Shobhit Mishra

(32)

LRP

Descriptive Questions : Marks

5.6 You are the management and investment consultant to Surgical Equipments Limited. 3+2

(i) Briefly explain FEMA regulations for ODI proposed in financial services activity in UK. 12.36 law

(ii) What is meant by business model and state the components of the business model opted by Surgical Equipments Limited. 1.24 law

5.7 State whether generation of e-way bill is required or not in respect of warranty supplies made by Surgical Equipments Limited. Also, the period up to which the books of account or other records of the financial year 2018-19 is to be maintained by Surgical Equipments Limited. 5

e-way bill Does it accrue (VB=7.6)

5.8 If you have been appointed as strategic consultant, what measures will you suggest to the management to defend itself against hostile takeover ? 5

AFM - M&A (ICAI)

The 3rd point is only in an ideal scenario, but 1 and 2 in my opinion are non-negotiable.

Writing time

1. **Stick to your process.** Trust yourself and avoid making any big changes unless absolutely necessary.
   This is why it is also important to practice the process again and again repeatedly as even a 1% doubt can cause you to doubt the simplest of questions.

2. **IBS isn't about attempting with 100% accuracy**. Most of us believe that in this paper since its open book – you cannot afford to get a question wrong.
   While this mindset is needed during the prep time – it is very dangerous during the writing time.
   Priority is attempting 100% of the paper over attempting 60% with 100% accuracy.
   Learn to move on once a Q is done is something that should be practiced and this cannot happen if you are adamant on checking every word of every question with the reference materials. Trust yourself!

3. **Once a particular question is solved, strike that relevant part of the case study with a pencil** so you don't have to refer to it while solving the remaining questions. This helps further save those few crucial seconds of searching.

4. Try to ensure **you don't eat up one case studies time with another**, you can always leave space and come back to it later. Once the 1 hour is done for that case study, ideally that case study shouldn't be seen throughout the remaining paper, treat one hour as one exam which once done cannot be referred back to again.

5. One tip for audit specifically would be to **try to find a question on similar lines in the question bank** first before referring to the main theory book especially for chapters like Reporting (SA 700's) as in our attempt (May 2025) a 5 mark Q was asked from group audit question bank as it is by just changing a few numbers. If you aren't able to find its okay, finding it should be seen as just a bonus and not the main motto.

By Siddhant Misra

Indexes

Now that you are aware of the various points to be kept in minds, what indexes helped me during the exam?

Remember **over indexing is also not recommended as it may end up wasting time instead of saving it.**

Indexes I used (*Refer the succeeding pages for the index/*) –

1. ICAI index for the purpose of determining the relevant module number for that particular chapter. (Page 1-4)
2. Costing theory index (5-10)
3. Law index (11-25)
4. Cost sums index (26-30)

If you do decide to make your own index – there is nothing like it. The above may be used as reference in case it is helpful.

I hope this has been helpful, please feel free to reach out to me at sid.misra03@gmail.com or on LinkedIn.

1	23	**How to conduct value chain analysis** (Determine cost and value|Assess comp adv - **Internal cost analysis/External differentiation/Vertical linkage**
1	24	Ostelwalders **Business model/How to draw business model** (changes in bus model = 5.9) Customer segment| Value proposition|Channels| Customer relationship|Rev stream|Cost structure
1	29	**Value proposition canvas** (Based on element of Customer segment and value proposition of BM and to show fit between co. offering and cust want) - **Cust Job/Pain/Gain**
1	31	Value proposition map (**Product and services, Pain reliever, Gain creator**) [Problem-soln/Product market fit
1	31	**List of elemens that contribute to customer value creation**
1	32	Key questions that business must ask while working on value proposition canvas
1	32	**External environment context - *Industry/Remote environment (STEEPL)/Industry operating environment***
1	35	**Porters Industry profitability - 5 force model that drive competition** (Bargaining power/Threat of new entrant/Substitute/Competitor)
1	72	**Examples of each Porter 5 force model** to identify which one
1	37	Intercornnectedness of barriers/ Impact of **entry/exit barriers on risk and profitability** - [Low|Stable Retirement
1	38	(criteria of the same - homegenous internally/externally |identifiable|responsive) Market & Market Segment
1	39	**Segmentation analysis** - (Product/demographic/psychologial/behavioural/geographic)
1	41	Determining **basis of competition**/Industry key success factors or ~~**critical success factors**~~
1	42	~~**Key performance indicators** (KPI)~~ (see 9.4 = Better) for CSF & KPI **Core competencies analysis** (Sources and test of core competencies|How to exploit core competencies)
1	43	Information technology strategic context - **IT vs IS vs IM strategy** (Also see pg 2.20-2.21 in Unit 2) **(Info technology/system/management)** Earls framework to link and distinguish between above 3 strategies
1	45	IT and Porters 5 forces - **Customer data mining| Lock the customer** [IS to improve strategy (2.21) RFID
1	48	**IT/IS and the value chain** - Logistics/Operations/marketing/After sales/**Restaraunt and robots/e-Procurement** United parcel services - **largest wireless network**
1	50	**HR technology**
1	51	Role of **management accountant as a leader**
1	55	Management by walking around/Communication by management acc
1	56	Why do managers make **Irrational decisions?**
1	57	**Business ethics** | Milton friedmane classical approach|Socio eco approach|"Means justify ends"

Module - I

		2. Modern business environment
2	3	Transition from **sellers to buyers market**
2	3	**Cost of quality (COQ)**
2	4	Prevention/Appraisal/Internal & External failure costs
2	8	**Optimum COQ**
2	10	Prevent, Appraise, Failure (**PAF model**) **Iceberg model** (Many costs are hidden)
2	11	**Total quality management** (TQM) **Six C's** of TQM **Demings 14 point methodology** to achive quality improvement
2	14	Plan do check act cycle/ **Deming wheel** (continuous improvement) Implementation of TQM and **criticism of TQM** **- Total employee involvement**(Carlzon) ***aka*** Front line of customer service troops **- TQM vs Six sigma**
2	17	**Supply chain management - Push vs Pull (pg 19), Upstream vs Downstream (Pg 19)**
2	19	**Supplier relation management**
2	20	**E- procurement, E-purchasing, E- Payment etc**
2	21	Information system and IT - **a source of competitve advantage**
2	22	**(Cost leadership, Differentiation, Focus)** **Six market models** - Internal/Referral/Influence/Recruitment etc.
2	24	Customer relationship management (**CRM**) **Customer account profitability(CAP)** (Platinum/Gold/Iron customers) **Customer life value**
2	28	Customer selection,acquisition, extension
2	30	**Service level agreement (SLA)** + Apples supply chain example
2	31	Building **resilient supply chains** and **recent disruptions** highlighting weaknesses in supply chain
2	32	**Gain sharing arrangement**
2	34	Downsizing, outsourcing and offshoring
		3. Lean system and innovation
3	3	Wastes that **lean system** will reduce **Benefits/Issues** of lean system (*Optimize workflow,minimize waste*)
3	5	**Advocates** of lean management **Just in Time** (JIT Purchase/Production/Support)
3	7	**Action plan** for JIT - Employees ,Setup time, accounting, workforce
3	8	**Kanban card | Cellular manufacturing(pg 33 also)** (*Flow of parts from one machine to another*)
3	10	**Features/Pros and Cons of JIT** **Pre requisites** of JIT **Impact** of JIT
3	11	**Backflushing in JIT** and its problems
3	16-18	**Kaizen costing** (*Small continuous improvement*) Process| Principles of Kaizen | Kaizen vs Standard costing|
3	19	How is cost reduction target established? - Bottom up and Top down path
3	21-24	5's - **Seri|Seiton|Seiso|Seiketsu|Shitsuke** (*Sort/Set in order/Shine/Standardize/Sustain*)
3	22	**Sorting and lean system** | Sorting w **visual aids**|How to **classify materials** or **implement systemic arrangement**
3	25	5S in **lean product and process development** or a core enable of continuous improvement (**PDCA cycle**)
3	28	**Total productive management** (TPM)| How to introduce the same and **its pillars with 5s as foundation**
3	30	Performance measurement in TPM - **Overall equipment effectiveness (OEE)** [Availability X Performance X Quality]
3	32	**Availability/Performance/Quality ratio** and **alternative formula** for OEE
3	33	**Cellular manufacturing - (***U Shaped /Ultimate in lean production***)**
3	36	**Difficulty in flow** of cellular manufacturing/Benefits and costs
3	34	Production flow analysis **Clustering methods - Part family grouping/Machine part grouping/Machine grouping** **Rank order clustering algorithm**
3	37	**Six sigma** (*Zero defects*) | Numeric concept for six sigma
3	38	**Value of defect %** at various sigma levels | **Implementation of six sigma** **(DMAIC** and its application)
3	53	**"Takt time"** - max available time to meet customer demands **Heljunka**
3	43	**DMADV | Differences** in DMAIC and DMADV **Limitations** of six sigma
3	44	Lean six sigma | **Process innovation - Production/Delivery/Support services**
3	45	**Business process reingeneering** (BPR) and process innovation

Module - 1

4. Specialised cost management techniques

4	1	**Cost control vs Cost reduction define** | Scope of cost reduction (*where max efforts should concentrate to reduce costs*) | **Diff between cost redn and control (4.7)**
4	5	**Standardization of components** + Impact on cost redn
4	7	**Target costing** | Limitations of traditional costing overcome by target cost | Steps of target cost (4.9) | Pros and cons(4.11-12)| Companies with which features gain most from target cost (4.15)
4	11	**Questions manufacture should answer to close the gap and improve**
4	15	**Impact of target costing on profitability** and **useful situations of target cost** (Fast food + Chemical industry)
4	16	Components of target costing - **Value analysis vs Value Engineering**
4	17	*Can we eliminate functions/durability| minimize design| design better| substitute parts etc*
4	21	Value analysis vs Functional analysis
4	23-25	**Lifecycle costing - Product lifecycle stages (Introduction, Growth, Maturity and Decline)** or by Raymond Vernon - ***Growth/Maturity/Saturation/Decline***
4	27	**Charateristics of above lifecycles basis sales/cost per cust/profits/competition etc and what strategy to use in each lifecycle**
4	29	Connection between BCG Matrix and product lifecycle | Characteristics and benefits of PLC
4	31	**Uses of prod life cycle** (Planning/controlling/forecasting)/ **Factors to maximize product return**
4	33	Theory of constraints | Bottlenecks | **Throughput/ investment/ operating expense measures**
4	33	**Goldratt five step model** to improve performance
4	35-37	**Throughput ratio** | *Advantages and disadv of throughput acc*
4	41	Why is EMA imp (38) Internal env vs External env costs | US EPA classification - **conventional/hidden/contingent/corporate image costs|** Classification by Hansen and Mendoza **(Env prevention/appraisal/internal failure/ext failure)**
4	44	**Input output analysis | Flow cost accounting| Lifecycle accounting| Activity based costing**
4	45	**Environment related vs Environment driven costs| Allocation of environmental cost**
4	49	How to control environment costs - waste/water/energy| **Role of EMA in decision making (Pros and cons)**

5. Management of cost strategically for emerging business models

5	3	**Change drivers** of dynamic business environment
5	4	**Internet of Things | Robotics | AI**
5	6	**Machine learning | Automation** (Basic,Process,integration and AI automation)|**Cloud**
5	7	**Migrate application to cloud** - 5R's | **Auto vehicles|3D printing**
5	8	Digital twin | Augmented reality | Mobile internet|Blockchain|**Business ecosystem**
5	9	Change in business model - **Automation/Extension/Transformation**
5	11	Impact of changing business ecosystem | How does **ecosystem influene cost/value/performance**
5	11	**3 Flyweels** (**Data** flyweel, **Growth** flyweel, **Cost** flyweel)
5	12	**Hypercompetition and Responses to the same**
5	41	Focus on short term advantages in hyper competition
5	13	**Transformation | Disruption | Sustaining innvoation vs disruptive innovation**
5	42	Strategic responses to disruptions - Milking cash flow/Invest/Block path/Counter disrupt/Withdraw
5	14	**Low end and New market disruption | Components of disruptive innovation**
5	15	**Advanced manufacturing | Aims** of advanced manufacturing and its **impact on cost and value** *(Linked islands/Full integration/Standalone/Cells)*
5	16	| Computer aided design/mfg|Computer integrated mfg **(GT/CM/NC/FIMS/CAD/CAM/CIM)**
5	17	**Lean startup | Diff with traditional**
5	19	**Agile organisations - Traditional vs Agile organisations** | Characteristics of agile org
5	20	**Innovation** - Core of design thinking, lean startup and agile
5	21	**Comparitive design thinking - Lean startup, Agile, Six sigma**
5	22	**Startups | Startups vs Incumbent | Stages of startup > Unicorn>Incumbent**
5	24	**Intrapreneurship | Innovator hubs** & incubators & Startup hub **|Accelarators**
5	26	**Supply chain partnership | Supply chain innovations**
5	27	Essentials of supply chain collaboration
5	39	Benefits of **supply chain partnership software to org**
5	29-33	**Business models and its types**
5	35	**Sustainable business model** and approaches to develop the same
5	35	p
5	37-38	**Emerging markets/economies | Characteristics of emerging market for business model**
5	39	**Strategic responses to new business models** - Digital advancement
5	40	**Value based** strategy/Value capture model | **Strategic** aspects
5	43	**Considerations while selecting crafting strategy**

"Strategy to capture value / create eco-system" (Cos 40)

Anything with "pricing" ↓

6. Strategic revenue management

6	2	Cost Volume Profit **(CVP) Analysis**
6	4	Activity Based **(ABC)** CVP - **Unit/Batch/Product sustaining/Facilities** level activities
6	4	Split of fixed cost using activity based costing so as to use only non volume driver fixed costs for **BEP | Relevance of CVP with ABC**
6	13	**CVP in Just in Time environment**
6	14	**Relevant costs** that affect decisions | **Decisions involve** i) **Ethical considerations** ii) **Non - financial considerations**
6	17	Decision making model - **Shut down** of plant (17), **Outsourcing| When to outsource** (19), **Sell or process** (22)
6	24	**Minimum pricing decisions** (24) | **Keep or drop** (25) | **Special order** (27) | **Product mix** (30)
6	28	Dangers on **concentrating excessively in short run**
6	34-36	Pricing policy and decisions | **Factors influencing pricing** decisions
6	36	TR line | TC/MC line | TR at unlimited units sold
6	37	Profit maximization model| Economic theory of pricing - (MR=MC)
6	38	**Price under diff competition** - Perfect competition/Monopoly/Monopolistic/Oligopoly
6	40	**Pricing of oligopoly | Non price strategies**
6	41	**Price sensitivity - Unique value effect /Inventory effect/Quality/Sunk investment/End benefit/Total exp/Difficult comparison/Substitute value effect**
6	44	Pricing of new products - **Revolutionary product, Evolutionary, Me-too product**
6	46	**Pricing policy** (*skimming/penetration etc*) - **New product for company or market or both, Perishable item etc**
6	53	Bearing of **product lifecycle on price of product** - Introductory/Growth/Maturity/Decline phase
6	45	**Skimming pricing** and **penetration pricing**
6	48	Mark up pricing | Target rate of return | Going rate pricing (50) | Sealed bid (51)
6	51	Value based pricing - **True economic value/Objective value**|What **framework** should be considered **to create value**
6	57	**Sensitivity** in pricing (57) | **Pricing In recession** period (57) | **Pricing below** marginal **cost** (58)
6	59	**Ethical pricing issues** - *Collusion/Cartel | Vertical and horizontal pricing | Skimming | Bid rigging| Price discrimination| Super pricing*
6	62	Geographic pricing | **Distributor/Qty/Cash/ Seasonal discount**
6	63	Promotional pricing - Special event pricing/Loss leader/Psychological pricing
6	64	Product mix pricing : *Product line pricing/Optional feature/Captive product/Two part pricing/* ***Pure and mixed bundling***
6	65	**Kanos performance attributes** - *Threshold/Must be quality | Performance/One dimensional attribute | Excitement or delight attribute/Indifferent quality/Reverse quality/Questionable quality*

7. Strategic profit management ↓ "Profit"

7	2	**Strategic profitability analysis - 1.Growth component** (Revenue and cost effect) **2.Price recovery component 3. Productivity component** (Fixed and variable cost)
7	5	**Reconciliation of operating profit**
7	7	Profitability analysis through **activity based costing (ABC) - Direct product profitability (DPP)** and **Direct profitability statement**
7	13	Customer profitability analysis (13)| **(ABC) Activity based costing and Activity based management -ABM (16) Difference between ABC and ABM** (26)| **Benefits of ABC** (27)
7	19	Implementing ABM - **Cost driver/Activity and Performance analysis**
7	19	**Value and non value added activities**
7	21	How is time spent in operations - **Receipt/Manufacturing/Manufacture cycle time** (***MCT***)/ Cycle time/Derlivery time
7	23	**Manufacture cycle efficiency** (***MCE***) | **Business process reingeneering (26)** - Benchmarking and perf measurement
7	28	**Activity based budgeting (ABB)**
7	32	ABC - complement to TQM/Decision making tool
7	34	**Pareto Analysis**

Module 2

8. Introduction to strategic performance management

8	3	**Strategy| Performance management| Link between the 2**
8	7	**Business integration** and its use to overcome sub optimisation
8	7	**Value chain** and Value chain analysis | **Primary activities and Support activities types** (8)| **Value drivers**
8	10	**Value vs Non value added activities** and **Kaplan and Coopers** classification of the same
8	12	Linkage of value chain and performance measurement| **Sustainable competitive advantage using value chain**
8	13	**Mckinsey 7S's and its elements -** *Strategy (15)/ Structure(15) / System(20) / Style(21)/ Staff,Skills and shared values(21)* **/ 7s in fastfood chain eg (22)**
8	23	***Questions to answer for each S by organisations/*** *Use of 7s in business integration*
8	15	**Underlying principles of organising/org structure** : *Functional definition /Supervision/Specialisation/Centralisation/Scalar chain* Relation between **span of control and number of cross relations**
8	17	**Types of organisational structures** - *Entrepreneurial/Line/Functional/Divisional/* ***Matrix/Project organisation /Network***
8	24	***Change management and gap analysis*** with 7S framework
8	25	Link between 7s and performance management| **Influence of structure/culture/strategy on performance measurement**
8	28	**Complex business structures** - Problems and solutions thereto| **Strategic alliance, Joint venture and Multinationals/Supply chains and virtual organisations (29)**
8	31	**Behavioural aspects -** *Accountability (Hard/Soft) | Behavioural control and Personnel control*
8	33	**Why do Companies fail?** | Need to **predict corporate failure** and **models to do so | Preventing corporate failure (41)**
8	34	**Altman Z Score** (34) | Altman Z score for private firms, non manufacturers and emerging markets(37)
8	36	**Taffler and Tishaw model, Beavers Model , ZETA Model**
8	38	Performance analysis score/ **H Score model/**
8	39	**Argenti A score -** *Defects/Mistakes and Symptoms of failure*
8	41	**Shortcomings of qualitative models to predict corporate failure**

9. Strategic performance measures in private sectors

9	2	**Responsibility accounting** (Also see Pg 11.3)| **Responsibility center**
9	4	**Critical success factors (CSF) and Key performance indicators (KPI)** | Goals vs objectives
9	7	**Performance measures *(Measures vs Indicator)*** | Is considering pure financial indicators enough? | Pros and cons of performance measures
9	8	Financial measures - **Gross profit/ Return on capital employed |**
9	11-12	**Return on investment vs Residual income** | ROI can hinder goal congruence| Size effect on RI
9	15-17	**EPS | EVA |** When does EVA increase| **NPV (19)**
9	20	**Difficulties in using qualititative informantion** /non financial indicators
9	22	**Balanced scorecard** - Kaplan and Coopers classfication of perf measures **(Financial/Customers/Internal and learning perspectives) | Balanced scorecard vs Triple bottom line (37)**
9	24	Why balanced scorecard fails to provide desired results | Example of the scorecard
9	24	**Financial/Customers/Internal and learning perspectives - Strategic objectives and corresponding measures** *(Eg Learning and innovation - Eco friendly product line - No. of eco friendly products)*
9	29	**Performance pyramid** (Comparison with balanced scorecard and identifying flow of objectives and measures)
9	33	**Building block model (i)Determinants :** Quality/Flexibility/Innovation/Res utilization **ii) Standards iii) Rewards**
9	35	**Link between coroporate strategy and management of human resources**
9	35	**Triple bottom line -** *People,Planet and performance* | **Bearable, Equitable, Viable and sustainable**
9	52	**Identidy which of the following aspects need to be reported and where in the TBL (52)** *(Example : Medical staff conduct camps - Social bottom line)*
9	38	Performance management system **(PMS)** and **Role of Quality management system and lean production system to support PMS**

10. Strategic performance measures in NPO

10	2	Performance measurement in NPO's
10	4	**Challenges for measuring performance and way out**
10	5	**Value for money (VFM) framework** | *Effectiveness/ efficiency/economy/equity/ethics*
10	6	Adapted balanced scorecard for NPO

11. Performance reports

11	3	**Performance report and its role** | Why do entities issue performance reports (4)
11	4	Aspects in preparing performance reports
11	7	**Types of performance reports** - *Earnings value/Forecasting/Progress/Status/Trend/Variance*
11	7	**TBL Report| ESG report| GRI reporting| Integrated reporting**

12. Divisional transfer pricing

12	1	Goal congruence | Utility of transfer pricing

By Nupur Mishra

12	5	Question of fair value + **Behavioural consequences of TP**
12	7	Market based TP + **Shared profit relative to cost** method
12	11-13	**Cost based | Marginal cost** based | **Standard cost** based TP| **Full cost** based | **Negotiation based**
12	23	Resolve TP conflict - **Dual rate transfer pricing | Two part transfer pricing**
12	25	International transfer pricing

By Siddhant Misra

Law index

Chapter 1- Appointment and Qualification of BOD

Sec No	Section Name	Pg No	Sec No	Section Name	Pg No
149	Company to have BOD	1.1	161	Additional, Alternate, Nominee Dir. & Casual Vacancy	1.10
Rule 3 & 4	Companies (Appt and Qualification of Directors) Rules, 2014	1.1-1.2	Extra	Summary of Sec 161	1.11
149	Who can become an ID?	1.2	162	Appointment of Directors to be voted individually	1.11
Extra	Sec 149 vs 177	1.2	163	Principle of Proportional Representation	1.12
2(52)	Definition of Listed Company	1.2	164	Disqualifications for Appt of Dir.	1.12
150	Manner of Selection of ID and Maintenance of Databank of ID	1.4	165	Number of Directorship	1.13
Rule 6	Companies (Appt and Qualification of Directors) Rules, 2014	1.4	166	Duties of Directors and its contravention	1.13
151 + Rule 7	Appt of Small Shareholders Director (SSD)	1.5	167	Vacation of office of Directors	1.13
152	Appt of Directors	1.6	168	Resignation of Director	1.14
153 + Rule 9	Application for DIN	1.7	169	Removal of Director	1.15
154	Allotment of DIN	1.8	170 & 171	Register of dirs. and members' right to inspect the register	1.16
155 to 159	Addnl points related to DIN and penalty for contravention of Sec 152, 155 & 156	1.8	172	Punishment for contravention of the whole chapter	1.16
160	Right of person other than retiring director to stand for directorship	1.9			

Chapter 2- Meetings of Board and its Powers

Sec No	Section Name	Pg No	Sec No	Section Name	Pg No
173	Meeting of Board	2.1	183	Power of BOD & Other Persons to contribute to National Defence Fund + Political cont.+	2.11
173(2)	Participation in BOD meeting (in person/AV /video)	2.1	Extra	Summary table for section 181, 182 & 183 cont to charitable	2.11
Rule 3	Meeting of BOD through VC/other AV + Minutes of meetings (2.2)	2.1	184+ Rule 9	Disclosure of interest by dir. (interested dir)	2.12
173(3)	Notice of BOD meeting	2.3	185	Loan to directors, etc.	2.13
173(4)	Penalty for failing to send notices	2.3	186	Loan and investment by Co.	2.14
174	Quorum + Intesested director	2.4	Rule 12	Companies (MBP) Rules, 2014 (MBP-2 letter of AW)	2.16
175	Passing of Resolution by Circulation (RBC)	2.4	187	Investment of company to be held in its own name	2.16
176	Defects in appointment of director not to invalidate actions taken	2.5	Rule 14	Companies (MBP) Rules, 2014 (MBP-3) Persons in whom dir is interested	2.17

Invest in. (layers/ limit on CIG)

177+ Rule 6/6A	Audit Committee +RPT approval (2.6)	2.5	188	Related Party Transaction +Approval = OR +Vote by RPT	2.17-2.19
	Omnibus approval (OA) for RPTs + Trans w director = VDI doable	2.6	2(76) & 2(77)	Definitions of Related Party and Relative	2.17
	Rights of AC	2.6	Rule 15	Companies (MBP) Rule, 2014	2.18
	Vigil Mechanism	2.7	189	Register of Contracts or Arrangements in which directors are interested MBP 1 MBP-4	2.19
178	Nomination Remuneration Committee	2.7	Rule 16	Companies (MBP) Rule, 2014	2.19
178	Stakeholder Relationship Committee	2.8	190	Contract of Employment with Managing or Whole-Time Directors	2.20
179	Power of Board (SR to be passed in some cases) Sell undertaking/amalgam/Borrowings/Debt from dir	2.8	191	Payment to Director for CPLO, etc., in Connection with transfer of Undertaking, Property or Shares +CPLO	2.20 Disclosure 3.10
180	Restriction on power of Board	2.9	192	Restriction on Non-cash Transactions involving Dirs.	2.21
181	Company to contribute to bonafide and charitable funds, etc.	2.10	193	Contract by One Person Co.	2.22
182	Prohibitions and Restrictions Regarding Political Contributions	2.10	Extra	Comparison of registers MBP-1 + MBP-2 + MBP-3 + MBP-4	2.22

Chapter 3- Appointment and Remuneration of Managerial Personnel

Sec No	Section Name	Pg No	Sec No	Section Name	Pg No
Extra	Key Definitions- KMP, Manager, MD, WTD, Remuneration	3.1	199	Recovery of Remuneration in Certain Cases (Restatement of FS)	3.10
196	Appt of MD/WTD or Manager MR-1 + MR-2	3.2	200	Company to fix limit with regard to remuneration	3.10
Part I of Schedule V	Additional Eligibility Conditions for MD/WTD/Manager	3.2	201	Forms of, and Procedure in Relation to, Certain Applications	3.10
197	Overall Max. Managerial Rem & Managerial Rem in Case of Absence or Inadequacy of Profits (CFLO)	3.3	202	Compensation for Loss of Office of MD or WTD or Manager (Also see Pg 2.21) MD/Mgr/CEO/CS/CFO	3.10
Case Law	Bell vs Lever Bros [Remuneration +	3.5	203	Appt of KMP and its contravention	3.11
Part II, III & IV of Schedule V	Remuneration & Certain conditions + Nidhi co. sem. + Sitting Fees + Disclosure in BR + Exceeding limits	3.6-3.9	204 & 205	Secretarial Audit for Bigger Companies & Function of CS MD+Mgr in 2 co. (1)	3.12
198	Calculation of Net Profits Pecuniary (3.8)	3.9			

Chapter 4- Inspection, Inquiry & Investigation

Sec No	Section Name	Pg No	Sec No	Section Name	Pg No
206	Power to call for info, inspect books and conduct inquiries by ROC	4.1	218	Protection of Employees During Investigation (can't suspend)	4.7
207	Conduct of Inspection and Inquiry + Power of civil court + Penalty & contravention	4.2	219	Power of Inspector to Conduct Investigation into Affairs of Related Companies, etc	4.8

206-208 for Inspec/Inquiry by ROC/CG

209-216 ~~for~~ Investigation

208	Report on Inspection made	4.2	220	Seizure of Docs by Inspector	4.8
209	Search and Seizure, max period of seize	4.3	221	Freezing of Assets of Co.	4.9
210	Investigation into affairs of Co. by CG	4.3	222	Imposition of Restrictions Upon Securities	4.9
211	Establishment of SFIO	4.3/ 4.4	223	Inspector's Report [N.A. to investigation by SFIO u/s 212]	4.9
212	Investigation into affairs of company by SFIO + Arrest	4.3	224	Actions to be Taken in Pursuance of Inspector's Report by tribunal	4.10
213	Investigation into Company's Affairs in other cases by Tribunal	4.5	225	Expenses of Investigation (who bears)	4.10
214	Security for Payment of Costs and Expenses of Investigation (Deposit)	4.5	226	Voluntary Winding up of Company, etc., Not to Stop Investigation Proceedings	4.10
215	No firm, BC or other association shall be appointed as an inspector	4.5	227	Legal Advisers & Bankers Not to Disclose Certain Info.	4.11
216	Investigation of Ownership of Co.	4.5	228	Applicability to foreign cos.	4.11
217	Procedure, Powers, etc., of Inspectors - Period of custody ⇒ Removal arrangement ⇒ disobey inspector = penalty	4.6	229	Penalty for Furnishing False Statement, Mutilation, Destruction of Documents	4.11

Chapter 5 - Compromises, Arrangements and Amalgamations

Sec No	Section Name	Pg No	Sec No	Section Name	Pg No
230	Power to compromise or make arrangement with Crs. & Mem	5.1	236	Purchase of minority shareholding	5.7
231	Power of Tribunal to enforce compromise or arrangement	5.2	237	Power of CG - for Amalgamation of Cos in Public Intt.	5.7
232	Merger and Amalgamation of Companies	5.3	238	Registration of Offer of Schemes Involving Transfer of Shares	5.8
234	Merger or Amalgamation of Company with Foreign Company	5.4	239	Preservation of Books and Papers of Amalgamated Cos.	5.8
233	Merger or Amalgamation of Certain Cos	5.4	240	Liability of Officers - Offences Committed Prior to M&A etc.	5.8

FEMA

Chapter	Page number	Particulars
SS. FEMA	12.2-12.3	**Definition** of current and capital account transaction Person resident in India definition
SS. FEMA	12.5-12.6	**Schedule 1,2,3 - FEM (CUAT)** [Remittances & their approvals] - Drawal of Fx is prohibited for which purposes **[Sch 1]** - Transactions and limits for which prior approval of GOI and RBI is needed (LRS) **[Sch 2 and 3]**
SS. FEMA	12.6	Meaning of **PRI but not permanently PRI** and limit + FEFE/RFE Acc
SS. FEMA	12.8	**Imports** - Mode of making payments , Time limits, Extentsion
SS. FEMA	12.9	**Limits** for Bringing of Forex , Indian currency and currency notes in India
SS. FEMA	12.9	Guarantee by AD for import (G&S)
SS. FEMA	12.10	**Capital acc transactions (CAT)** When can PRI hold, own transfer Foreign assets and currency without approval
SS. FEMA	12.11-12.12	Approval for Capital acc transactions is needed when? FEM (Permissible CAT) Regn 2000 Prohibited capital account transactions
SS. FEMA	12.13 - 12.22	**ECB related** + Unbarceable entity (17)
SS. FEMA	12.22 - 12.23	**Export of goods and services** Regulation Export - when is declaration needed/not needed for export eg: gift Importer exporter code **(IEC)**
SS. FEMA	12.24	Exports realization time limit and documents to be submitted
SS. FEMA	12.25	Exports requiring prior approval from RBI Advance payment against export and interest on the same Project exports [Turnkey project]
SS. FEMA	12.26	Who can be **Authorised person** + OBU
SS. FEMA	12.27	Penalty for contravention of FEMA
SS. FEMA	12.27-12.28	Non payment of penalty - **Consequences, Compounding of offences** (Jail, civil improsonment)
		Foreign overseas investment rules 2022
SS. FEMA	12.29-12.30	**Definition** of Foreign entity, Overseas investment,OPI, ODI, Debt instruments, Rights and bonus **Non applicability of rules**
SS. FEMA	12.31	When is OI allowed
SS. FEMA	12.32	NOC by NPA/Defaulter etc before investing
SS. FEMA	12.32 - 12.33	Transfer of equity share capital /Liquidation/Restructuring conditions **Certificate of dimunition** of value
SS. FEMA	12.33	Restriction on making ODI in certain places
SS. FEMA	12.34	Restriction on transfer of immovable property o/s India
SS. FEMA	12.35	**ODI by IE** - in financial services activity] Sch I **Limit on Financial commitments**
SS. FEMA	12.35	**OPI by IE** Sch II
SS. FEMA	12.36	**OI by IE (OPI and ODI Common)** in Financial services activity Gift/Inheritence of foreign securities Acquisition of shares by ESOP/Sweat eq shares
SS. FEMA	12.37	**OI by PRI other than IE or Resident** ODI by Trust, MF,Venture capital, AIF, Opening Demat Acquisition and transfer of forse by depository/ AD
SS. FEMA	12.38	**OI by IFSC**
		Foreign exchange Management (Overseas Investment) Regulations
SS. FEMA	12.38 - 12.39	Financial commitments other than equity capital Financial commitments by **Debt, Guarantee, Pledge**
SS. FEMA	12.40	**Acquisition of equity shares by deferred payment**
SS. FEMA	12.40	**Mode of payment of OI**
SS. FEMA	12.40-12.41	**Evidence** submission after aquiring Equity capital in FE Obtaining **UIN** **Repatriation fo dues from ODI** Earnest Money deposit/ Bid bond guarantee

By Shivangi Mishra

SS. FEMA	12.41	**Reporting req** Reporting for Financial commitment, Disinvestment, Restructuring Reporting of **IE other than resident** - **Making OPI** - **Transferring OPI** by sale OPI for **ESOP** reporting
SS. FEMA	12.42	**APR** related regulations Delay in reporting
SS. SEBI	11.1	Constitution, term of office of SEBI. Relinquishment of office
SS. SEBI	11.2	Members **not to participate** in meeting, **vacancy** not to invalidate proceedings. **Powers and duties** of SEBI
SS. SEBI	11.3	Powers of SEBI to inspect, attach property and impound during investigation. **Disgorged funds, Collective Investment Scheme**
SS. SEBI	11.4	**Power to investigate**, period of custody and penalty for failure. Search and seizure
SS. SEBI	11.5	**Cease and desist** order, Who all need **registration certificate**
SS. SEBI	11.6	SEBI General fund and audit
SS. SEBI	11.7	Penalties from 15A to 15HB - **All SEBI Penalties**
SS. SEBI	11.9	Power to **adjudicate**, which fund for penalties go and **settlement** of proceedings
SS. SEBI	11.9 - 11.11	**Securities appelate tribunal provisions (SAT) and penalties**
SS. SEBI	11.12	When can **CG supersede board**, **Returns** to be furnished to CG
SS. SEBI	11.13	Power to **grant immunity**, Penalty for offences (contravenes prov/fails to pay penalty)
SS. SEBI	11.14	**Special court** for speedy trial, **Recovery proceedings** for non payment of penalty/dues
SS. SEBI	11.15	**Legal representative** - Continuance of proceedings

SEBI LODR

SS. SEBI	11.16	**Applicability and BOD composition,** **Board Meeting** - Count, Quorum
SS. SEBI	11.17	**Max no.** of directorships, Provisions for **subsidiary of listed co** - Material transactions in subsidiary - Minutes of meeting - Notice for material transactions - Disposal of subsidiary -SR - Selling material asset of subsidiary
SS. SEBI	11.18 - 11.20	**Restriction on number of committee memberships** **ALL committee comparisons with Co Act**
SS. SEBI	11.21	**Statements and reports to be filed** by listed entity **Prior approvals** by Stock ex for certain transactions
SS. SEBI	11.22	Role of **compliance officer** Disclosure of **relationships between directors** **Disclosures** to be made **in corporate governance report** of annual report
SS. SEBI	11.23	Book building, Green shoe option, Offer document **Types of issues** - Public, Private, Composite, Bonus, Pvt placement
SS. SEBI	11.24	Applicability of ICDR
SS. SEBI	11.24	**IPO related provisions** *(Upto page 35 are all for IPO)* Entities **not eligible** to make IPO **Eligibility requirements** of IPO
SS. SEBI	11.25	Eligibility if **special rights (SR) shares issued to director** General conditions for IPO
SS. SEBI	11.26	Addn conditions for **Offer for sale**
SS. SEBI	11.27	**Issue of convertible instruments** **IPO of convertible instruments** and **conditions for conversion** of instruments to shares
SS. SEBI	11.28	Issue of **warrants and convertible instruments for financing** **Promoters contribution** for conv instruments IPO
SS. SEBI	11.29	**Lock in** on **securities held by promoters** Lock in on securities lent to agent under green shoe option **(Other lock in provisions)**
SS. SEBI	11.30	Disclosures in the **offer documents and draft offer documents** and filing of the same
SS. SEBI	11.32	**Pricing of shares and issue at differential prices**

By Shantanu Mishra

SS. SEBI	11.32-11.33	- Opening time, min subscription, period of subscription, min application value, manner of calls allotment procedure, interest on refund of allotment - Post issue advertisement
SS. SEBI	11.34-11.35	Releasing subscription money, Reporting transactions between promoters and Post issue report Restriction on further capital issues and **Price stabilisation** through **green shoe option**
SS. SEBI	11.36-11.37	FPO *(Upto page 11.45)* **Eligibility and conditions** **Issue of convertible instruments and warrants** **Promoters contribution**
SS. SEBI	11.38-11.39	Lock in and disclosure requirements Pricing of shares Differential pricing
SS. SEBI	11.40-11.41	**Book building process** **Reservation on competitive basis,** Abridged prospectus
SS. SEBI	11.42	**Prohibition of payment of incentives, Security deposit** **Underwriting** **Monitoring agency**
SS. SEBI	11.43-11.44	Application and application value, Post issue responsibilities
		SEBI SAST - Substantial acquisition fo shares
SS. SEBI	11.45	**Applicability** (Investor growth platform) Definitions - Offer period, Shares, PAC (Person acting in concert)
SS. SEBI	11.46	Who is **PAC** , **Threshold for acquisition** of shares and voting rights + **Public announcement, open offer** requirement
SS. SEBI	11.47	**Offer price** and innovators growth platform, **Obligation of directors**
SS. SEBI	11.48-11.50	**Obligation of aquirer** and obligation of **target company,** obligation of **manager to open offer**
SS. SEBI	11.50-11.51	Disclosure of **acquisition and disposal**, Disclosure of **encumbered shares**
		Insider trading
SS. SEBI	11.52	**Insider** and **connected person** meaning, **UPSI**
SS. SEBI	11.53	Restriction on communication of UPSI, Requirement of **structured digital database (SDD)**
SS. SEBI	11.54	**Trading when in profession of UPSI** and **trading plans**
SS. SEBI	11.55-11.56	Disclosure of trading by Insiders

11-57 [Codes of fair disclosure
Penalty for insider

SCMPE Firms P II/III

Chp	Page	Illustration	Particulars
2	7	Illust 1	**Rejection rate is given**, analyse whether proposal is beneficial to improve quality and analyse **max rejection rate**
2	9	Case	a) Examine **acceptance of QC proposal** and **recommend from financial and non financial perspectives** **b) Advice to achieve zero defects** through continuous Quality improvements **c) Suitable QC level at minimum cost**
2	26	Illust 2	Calculate **customer lifetime value per subscriber**
2	30	Case	Apples **supply chain - New product development process** **Very high risks**
2	33	Case	Discuss the agreement between Raya and Livlife (Gain sharing arrangement)
2	34	Case	Paraxel Need of recruitment solution to build talent pielines
2	41	TYK 1	**Explain how TQM would enable competitve adv in banking sector**
2	42	TYK 2	Prepare a **Cost of Quality statement** Prepare a **cost benefit analysis** and show **how the manager trade offs**
2	43	TYK 3	**Prepare statement of expected quality costs if it accepts proposal**
2	43	TYK 4	Advice **if inspection of defectives is justified** and which of the three suppliers should be asked to supply
2	43	TYK 5	Prepare a **statement showing total quality costs** and advise **any two measures to reduce non conformance costs**
2	45	TYK 6	Analyze **cost of poor quality per annum** Analyze **net beneft of inspection process proposal**
1	14	Case	**Do we consider all stakeholders or only those who are significant enough?**
1	45	Case	Why are firms supposed to have IT/IS strategy
1	66	TYK	What is the **correct combinations of pains/gains/relievers**
1	70	TYK	Value proposition canvas of Tesla | **How establishing manufacuring in China helps in primary activities**
3	13	Case	"M&M **wants to implement JIT** at their plant and its objectives are given so that **suppliers to participate/know any change in production process.**
3	14	Illust 1	("Forecasted demand in labour hours is given for 6mo") Sum on **using "Just in Time"** - Company wants to **avoid overtime payment** for which it plans to **utilize fully available working hours**.Comment on Managing directors view
3	50	TYK	**Explain Just in Time** | Calculate the **"takt time"** | **Advise whether company should shift to JIT**
3	51	TYK	Caclulate benefits of **shifting to JIT procurement system** Recommend **factors to be considered** before implementing JIT procurement system
3	20	Case	"**Recommend key changes** vital to MILs planning and control system to support **adoption of Kaizen**"
3	26	Case	Advise on **implementation of 5S**
3	40	Case	Advise on **implementation of DMAC** to reduce sales returns
3	31	Illust 2	**Calculate OEE** (Overall Equipment Effectiveness)
3	52	TYK 3 & 4	**Calculate OEE** (Overall Equipment Effectiveness)
3	52	TYK 5	State an appropriate measure to **measure total productive maintanence performance** of the equipment **Quantify the TPM performance of equipment**

STRATEGIC REVENUE MANAGEMENT

6	6	Illust	Find **break even point** using **CVP** | **Analyse impact on BEP** | When should **labour cost be factored in calc of cost of set up** | How can number of **set ups impact flexibility of machine**
6	9	Illust	Compute **unit and production runs** one should produce **to break even** | Advise whether to **break fixed costs into activity based costs** (in changed scenario)
6	11	Illust	Calculate **suggested fare per passenger km** taking into account markup | Transport sector = very regulated, **comment on two years profitability**
6	16	Case	Thirld world countries - child labour | Turned blind eye | **Discuss why Sprinter shprtswear should attempt to address this issue**

"quality cost / quality cost (or) unpaalon reasons

What framework to be considered to create value for cust

Decision making

6	17	Illust	**Reducing patient days,** increase re-admissionr rate | Calculate **impact of consultants plan on** profit
6	21	Illust	Recommend **make or buy decision on** unit basis and total
6	23	Example	Example on **joint product and bye product costing for sell or process**
6	24	Illust	Calculate **minimum price that XL should bid**
6	26	Illust	Comment on **decision to discontinue division** using relevant cost approach
6	28	Illust	Do you advise the company to **take up order for toys when it has order in books already** | If order qty increases would you advise company to accept?
6	30	Illust	Find **optimum product mix** (*limiting factor is mach hours*)
6	37 ~~39~~	Example	Calculate selling price that will maximize profits (*when variable cost, rate of increase in demand with reduction of SP is given)*
6	48	Illust	Calculate **average selling price of the final 500 units** so that the company earns profit of XX from the product if average time for XX **batches** is XX. **Learning coefficient/Logs given** in Quest
6	52	Example	Example on **True economic value**
6	54	Case	Explain with reasons for **change to unit selling price** when the product moves from **prev stage into i) Growth ii) Maturity phase**
6	65	Case	Insurance service provider adds surcharge per payment, Are **incentives/Discounts/Surcharges justified?**
6	77	TYK	Recommend a **minimum amount** that should be charged for **planetarium station - IMAX screen**
6	76	TYK	Advise on the **choice of plan** for a **school canteen** considering **Wireless Cash Management System**
6	77	TYK	Discuss the reasons behind dropping a profitable client - "No client is wirth losing my valued employees"
6	78	TYK	Analyse **profit improvement plan** - leisure hotel resort, graph of revenue, costs given
6	79	TYK	Advise regarding **"Optimum Plant capacity"** to install for tablet
6	79	TYK	**Analyse relevant costs of material to accept the order or not** - Following columns in quest : Material | Total units req | Units in inventory | BV of units | RV of units | Replacement costs
6	80	TYK	Recomment **minimum price to be charged** without any loss for **manufacturer of chemical products | Analyse reasons for inclusion or exc** of each cost associated with prodn
6	81	TYK	Airline data given for one flight - Analyse showing what **impact of dropping flight G-022 will do to profits**
6	82	TYK	Calculate **relevant costs to contract** to AUS, Explain each costs you have included | What could be **2 problems that arise using relevant costing** | Explan by giving examples **four types of quality cost that could be reduced** and **primary activity associated** for each one
6	~~84~~ 82	TYK	Manufacturer of **firefighting/safety equipment - Advise if worth accepting USD XX quote for** (*product being exported first time)*
6	85 ~~82~~	TYK	Budgeted cost (FC/VC) data given - **Analyse and determine best course of action** *(Proposed to adopt cost plus pricing and likely market responses/Qty for each SP are given)*
6	82	TYK	Supplier of firefighting and safety equipment | Exportinf first time | **Market research with sensitivity of units to different prices given** | Analyse and determine best course of action

TRANSFER PRICING

12	7	Eg	Manufacturer of conflakes... **TP based on shared profit to cost and market method + Analysis of results** Discuss effect on profitability
12	14	Eg	**Max that Div A will pay and B will pay for goal congruence/Minimum price A should charge**
12	16	Eg	3 products - **Labour is hour is limited** - Calculate TP of one product of the division
12	20	Eg	Fixed costs increasing based on every 10k units | B can buy at incomplete stage outside | A has a special order | **Calculate TP and show profitability in that option**

"What is best strategy for div A"

By Sinthuri Nisa

TRANSFER PRICING

12	23	Case scen	Two divisions Dx and Dy | **CEO worries TP suggested by Division Dx will not induce both managers**| Discuss **TP method to overcome performance evaluation conflicts**
12	26	Eg	Car mfg company - **2 divisions in diff countries | Determine if to purchase internally or externally**
12	27	Illust	**Miners has 2 divisions in Japan and UK for emeralds** | Calculate TP at **200% of costs and market price approach** and after tax operating income
12	33-37	Cae MCQ	Mobile phone mfg in India and France | **Calculate TP at full cost and similar CUP**|**and advise on behaviourial consequence**
12	40	2	3 products - X,Y and Z - **Y and Z need X but they need to do slight modification Addn Fixed Cost to install capacity given**| Discuss the best strategy for each division and company as a whole
12	41	3	Pulp division | Just aquired a small company of paper cartons| **Will managers of carton and pulp agreee to transfer price?**| *3 situations given*
12	41	Q4	2 divisions X and Y | Components Gex and prod Gextin but **manager of Gex is not willing to reduce price as itll affect divisional performance**| **Calculate present profit and analyse impact on profit if Y accepts offer of new supplier**| Discuss why top management should intervene and advise suitable TP
12	42	Q5	Analyse sales in terms of $ & units by B Annual prodn capacity given | Tf to A made factoring opp cost | Receievd additional demand but due to full capacity uncatered | **Analyse sales and recommend TP range** For goal congruence
12	42		Household division is marketing but is in a very competitive market| Any increase in price will push division out of the market| **Would u recommend supply of switches**

Specialised cost techniques

4	9	Illust	**Determine if above cost structure is within the target cost or cost reduction needed** (*Toy company, 2 components H1 and H2, Royalty to be paid*)
4	13	Case	Launched small and affordable bike| Target costing adopted| Environmentalists opposed bike| **Identify strategy adopted and challenges faced**
4	19	Illust	**Calculate expected total labour hours over lifetime** (*Learning curve effect given and after 250 units L hours are same)*
4	21	Case	Wood co- small family run business - Furniture. **How to improve sales volume costs and profits using value and functional analysis**
4	31	Illust	If the company expected the new system to last 12 years - which system to choose
4	31	Illust	Assist the manager in listing the types of cost affecting the **co. in four phases of lifecycle costing**
4	35	Illust	Calculate **throughput ratio** and comment on it
4	45	Illust	Calculate environmental cost per kg
4	58	TYK	Budget and actual hrs + Sqm given | **Calculate current cost and profit pu**| **Identify non value added activity**| **Identify target cost**
4	59	TYK	**Calculate budgeted lifecycle operating income** and advise strategies to develop **new watch**
4	61	TYK	**Calculate Lifecylce cost**
4	61	TYK	**Prepare total contribution statement for each stage of lifecycle and discuss pricing strategy of product alpha cube**
4	61	TYK	**Identify bottleneck he should improve**| **An improvement will cost 75K - Advise if he should implement**
4	61	TYK	**Use thoroughput accounting and identify max and minimum profit**
4	63	TYK	Why Wasco stopped using CFC and redesigned its product which was carbon oriented before gov initiated legislations| What is the risk exposure| **How to focus on env sustainability**
4	63	TYK	**Calculate productwise profitability based on original cost allocation** ***(Gen OVH are absorbed using a blanket rate*** *- 3 proceses tanning and dyeing and fishing given)*

STRATEGIC PROFIT MANAGEMENT

7	5	Illust 1	Manufacturer - 5 columns with **revenue and cost effect of growth component** etc| Calculate **how much change in operating income is due to market size factor/productivity and product differentiation** and **reconcile profits**
7	11	Illust 2	Calculate profitability using **Direct product profitability (DPP)**
7	14	Illust 3	Analyse **profit by comparing profit per unit for each customer** | Comment on **discount policy**
7	25	Illust 4	Calculate avg **non value added/value added time per batch and Manufacturing cycle efficiency and MCT**
7	42	TYK 1	Calculate **manufacturing cycle efficiency**| Calculate **delivery time**
7	31	Illust 5	Cost driver rates and amount of drivers used given| **Compute total budgeted cost and discuss advantages of activity based budgeting approach** |Benefits of Kaizen budgeting
7	35	Illust 6	**Pareto chart and identify key areas fo focus**
7	43	TYK 2	Comment on **income from operations for the 2 divisions accurately measure performance** | Prepare divisional income statement
7	45	TYK 3	Give financial analysis of the decisions/strategy **which it may implement using unit cost info available**
7	45	TYK 4	Analyse **customer profitability and explain 3 fundamental principls of JSM**
7	46	TYK 5	Compute **customer level operating income**| **Analyse profitability for each customer**
7	46	TYK 6	Prepare **customerwise profitability statement and recommend a strategy**
7	47	TYK 7	PV Ratio given | **carry out Pareto Analysis**
7	48	TYK 8	Carry out **Pareto Analysis** (see Ill 6 pg 7.35)

Cust

MCE

Pareto

cust related

Pareto

9	9	Illust 1	**Calculate GP ratio and ROCE**
9	12	Illust 3	**Calculate Return on investment (ROI) and state which manager is highest ROI**
9	17	Illust 4	**Calculate EVA**
9	20	Case	CEO has hired as you as management consultant and asked to suggest 3 functions whose heads raised concerns and **explain the scope of non financial perf indicators**
9	27	Illust 5	Analyse performance using **balanced scorecard**
9	42-52	TYKs	**Sums on ROI/EVA/Scorecard**

10	11	TYK	Identify and evaluate how management could **measure Value for Money** for the homeless service

Standard costing

Ill 1: calculate using → traditional variances (similar TYK 1,2,4,7)
→ diff betw planning & operational variance

Ill 2 (pg 13.9): Given: No. of cust deliveries, "calculate efficiency & exp variance using ABC approach" (13.10)

Ill 3: Show variances that reconcile actual labour figure with revise budgeted figures" (learning effect given)

Ill 4 (13.20): " Prepare reconciliation statement of budgeted to actual profit" (Revenue to profit details of ~~Sandals~~ SHOES given)

Ill 5 (13.22): " Prepare reconciliation of budget profit to actual profit using marginal costing approach" (Also see TYK 8)

Ill 6 pg 13.28: "Interpret sales mix and qty variance in terms of contribution" (3 products C-1 & C-2 & C-3 given) Given it follows just in time

Physiotherapy

Scenario (13.30): "Given different variances of operations".
Identify CSF for Natural Spice and evaluate mgmt decision with "Overall Corporate Strategy" and "Critical success factors"

TYK 1 & TYK 2 (13.55): Calculate variance using traditional variance and an approach that distinguishes planning & operational variance.

TYK 3 (13.56): "In total, performance agreed with budget but in every aspect other than volume = huge differences." Comment on mgmt accountants view

TYK 4 (13.57) → Calculate material variance → Traditional var analysis
→ Planning & operational variances
⇒ Analyse how planning & operational variances approach the variances
⇒ analyse how advanced variances are useful

TYK 5 (13.58) Calculate "flexible budget variance" → Receivable activity
→ Payables activity
→ Travel exp activity

TYK 6 (13.59) → Calculate variable overhead exp & efficiency variance for each activity using Activity based costing.
→ Interpret the results of (i)

TYK 7 (13.59) → Calculate planning & operational variance relating to material price, usage, labour efficiency & rate.
→ Calculate OVH exp & efficiency variance using ABC

TYK 8 (13.61) → Prepare reconciliation of budgeted profit to actual profit using marginal costing approach.
→ Explain implications → Mgmt is worried about customer feedback
Advice.

TYK 9 (13.61) Interpret direct labour rate & efficiency variance

TYK 10 (13.62) Calculate sales margin mix & sales margin volume variance

TYK 11 (13.63) statement contains material price & usage variance.
Evaluate performance measurement system

TYK 12 (13.64) Analyse variances computed
Advise Heston's results on "two types of flooring sold"
